

Capability Statement

Company Overview

JNJ Tech provide end-to-end, turnkey telecommunications solutions designed for carriers, infrastructure providers, government agencies, and enterprise clients.

End to end services included scoping, survey, pit & pipe work, asbestos removal, fibre and copper cable hauling, fibre splicing and copper jointing, testing, civil remediation, new conduit installation by trenching and boring method.

Our expertise covers comprehensive infrastructure and connectivity services for both residential and commercial projects.

Backed by a skilled team, we ensure seamless delivery - from design through to completion -across Australia's leading networks.

What We Do

Civil & Construction Works

Trenching, boring & pit installation, conduit installation, Lead in conduit installation and remediation, Cabinet & rack installations, Pit and pipe remediation including plastic and Asbestos, Site restoration and remediation

What We Do

Fibre & Copper Installation

Fibre optic and Copper cable installation, DFN and LFN fibre cable haul, NBN installation and Activation, Copper cable jointing & termination, Redundant cable recovery, Internal wiring and data cabling, Fibre splicing, testing & commissioning

What We Do

Equipment Installation & Integration

Rack & cabinet installation, Power systems (AC/DC, solar, UPS)
Network switch & router integration, Commissioning & testing,
NTD and modem installation with testing and commissioning

What We Do

Project Management & Delivery

Turnkey project execution, Permit & regulatory management,
Quality assurance & HSE compliance, End-to-end delivery and
reporting with 100% client's satisfaction within the client's budget

What We Do

Maintenance & Support Services

24/7 network fault response, Fault detection and Repairs,
Preventative & corrective maintenance, Network health audits &
performance optimization, Asset lifecycle management

What We Do

Non Friable Asbestos Removal

Site inspection & risk assessment, Safe removal & disposal of asbestos, Compliance & documentation, Restoration

What We Do

Horizontal Directional Drilling

We deliver complex Horizontal Directional Drilling that installs utilities underground without disturbing the surface. Our approach is faster, cleaner and safer than open trenching and reduces risk to nearby services.

Plant & Equipment

- 1x Vermeer D20×22 S3 HDD
- 1x Digitrek AERIES tracker
- 1x Vermeer VSK300-250 1000L Vac Truck
- 1x STG HDV 6000L Vac Truck
- 1x Kabuta VS-17 1.7 ton digger
- 1x JB's Unimix 24HP Mud mixer
- 1x JB trenchless 4000L Tank
- 1x Mitsubishi Canter HR truck
- 1x Sitrak G5S HR truck with beaver tail and ramps
- 4x Light Vehicle (3x Toyota Hiace , 1x Hyundai Iload)
- 2x Triton Single Cab Utes
- 1x Triton 4×4 Dual Cab Ute
- 1x Toyota Hilux 4×4 Dual Cab Ute
- 1x Vivax vLoc3-Pro Cable Locators
- 1x Radio Detection 7200
- 2x Tandem Trailers (8×4)
- 4x High pressure with jetter hose
- 1x 76mm Grundomat for boring
- 1x 185cfm Compressor
- 1x Walk behind trencher
- 1x Pipe Trailer
- Splicing Tools:
 - 1x Ribbon Sumitomo TYPE-72M12 Fusion Splicer
 - 1x Single Fibre Tumtec FST-83A
 - 1x Viavi MTS-4000 V2 OTDR
 - 1x Viavi Scope

STG HDV 6000L Vac Truck FOR HIRE

Meet Our Team

Jagpreet Singh
Managing Director

Jagpreet Singh has over 10 years of experience in the telecommunications industry, with extensive expertise in surveying, civil construction, and project delivery. Throughout his career, he has successfully led teams across both nbn and private sector projects, ensuring high-quality outcomes and operational efficiency. As a Director, Jagpreet provides strategic leadership and guidance, overseeing project planning, execution, and stakeholder management. His strong background in infrastructure development and network construction is complemented by his ability to drive business growth and maintain long-term client relationships. Jagpreet's leadership is defined by a commitment to innovation, safety, and compliance, making him a trusted figure in the telecommunications and civil construction sectors. His vision continues to shape the success and growth of the organisation.

Jagroop Singh
Operational Manager

Jagroop Singh brings over 6 years of experience in the telecommunications industry, with a proven track record in surveying, civil construction, and asbestos-containing materials (ACM) management across both nbn and private sector projects. As an Operational Manager, Jagroop is responsible for overseeing day-to-day project delivery, coordinating field teams, and ensuring compliance with safety and quality standards. His strong technical knowledge in civil works, network builds, and infrastructure delivery is matched by his leadership in managing stakeholders, contractors, and client expectations. Jagroop's career demonstrates a consistent ability to deliver complex projects on time and within budget, while maintaining a focus on workforce safety, regulatory compliance, and high-quality outcomes. His industry expertise and leadership make him an integral part of our operations team.

Meet Our Team

Jacob Coad
Drill Operator

Jacob brings strong hands-on experience in directional drilling, drill tracking and steering, service locating, and full pit & pipe delivery, having worked across residential and CBD environments on telecommunications and civil infrastructure projects. His background includes operating drilling rigs in live service corridors, navigating around high-voltage power, gas, water, and communications assets, and ensuring precise bore alignment and installation outcomes.

In his recent role as a Directional Driller, Jacob worked both autonomously and within structured crews, undertaking drill tracking, bore planning execution, asset identification, excavation, and reinstatement works including concrete, asphalt, and turf. His capability extends across operating HR vehicles, excavators, and supporting machinery critical to HDD site setups and project delivery.

With tickets including HR Licence, Excavator and Bobcat Tickets, and First Aid certification, Jacob is a safety-driven operator who understands the discipline, technical accuracy, and teamwork required to deliver successful HDD projects in complex environments.

His addition further strengthens J&J Tech's in-house drilling capability as we continue to expand our end-to-end telecommunications and civil infrastructure services across Western Australia.

William Burke
Head of Drilling & Training

With over 30 years of experience, Will delivers complex bore solutions across Australia's toughest ground conditions, supporting major telecommunications, water, and power infrastructure projects nationwide.

Skilled across all drilling platforms—from trenchless and rock systems to large maxi-rigs—he specializes in ground assessment, bore planning, precision steering, and production optimisation, earning a reputation as one of the industry's most trusted drillers.

Widely known as "the man that can," Will has built a reputation for delivering outcomes where others see obstacles — safely, efficiently, and to the highest technical standards.

At JNJ Tech, Will now leads drilling operations and crew training, mentoring the next generation of operators while embedding strong safety culture, technical excellence, and operational discipline across every project. His leadership further strengthens JNJ Tech's commitment to delivering high-performance trenchless solutions nationwide.

With decades of field-tested experience guiding our crews, JNJ Tech continues to raise the standard in horizontal directional drilling across Australia.
